OBJECTIVE

Full Stack Developer and DevOps Engineer with over 2+ years of professional experience in building and maintaining ERP systems, LMS platforms, AI-powered automation solutions, admin dashboards, and scalable web applications. Strong expertise in React.js, Node.js, TypeScript, databases, cloud deployment, AI integrations, and workflow automation. Experienced in end-to-end SDLC execution including system design, development, deployment, production monitoring, automation setup, and support. Adept at solving complex technical problems and delivering stable, high-performance solutions in fast-paced environments.

EDUCATION

Bachelor of Computer Applications (BCA)
University Maharani College, Jaipur
2021 – 2024 — Percentage: 72.3%

SKILLS

Programming Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, SQL

Frontend Technologies: React.js, Next.js, Redux, Tailwind CSS, Ant Design, Material-UI, Bootstrap

Backend Technologies: Node.js, Express.js, RESTful APIs, JWT Authentication

Databases: MongoDB, MySQL, Firebase

AI & Automation: ChatGPT, DeepSeek, Google AI Studio, Cursor
AI Chatbot Development, Prompt Engineering, API-based AI Integrations
ElevenLabs APIs (Voice Cloning, Text-to-Speech, AI Caller Systems)

Workflow Automation: n8n Automation, Webhooks, Event-based Triggers

WhatsApp & Meta Integrations: WhatsApp Business (Meta Cloud API), Template Message Setup, Auto Messaging, Meta Business Account Configuration

ERP & Platforms: ERP Systems, LMS Platforms, Role-Based Access Control, Admin Panels

DevOps & Cloud: Linux (Ubuntu), VPS Hosting, Domain & DNS Management, IP Mapping, Nginx, PM2, Docker (basic), GitHub Actions (CI/CD), AWS

Tools & Workflow: Git, GitHub, GitLab, Postman, Webpack, NPM, Yarn

Other: System Debugging, Database Schema Design, Production Support, SDLC

EXPERIENCE

Full Stack Developer / DevOps Engineer
CodeCafe IT Solutions — Jaipur, India
July 2024 – Present

Designed, developed, and deployed multiple production-grade ERP systems and LMS platforms used for business operations and internal management.
Led development of Solar ERP and SunCity Solar platforms, implementing dashboards, automated workflows, reporting modules, and role-based access systems.
Built an AI Caller system using ElevenLabs APIs enabling real-time voice cloning and automated calling workflows for business use cases.
Developed AI-powered chatbots for company services and customer support using API-driven architectures, prompt engineering, and secure integrations.
Configured Meta Business accounts and implemented WhatsApp Business (Meta Cloud API) including template creation, automated message sending, webhook handling, and lead-based workflows.
Designed and deployed automation workflows using n8n to connect APIs, trigger events, process data, and automate messaging and business logic.
Managed VPS servers including deployment, DNS and IP mapping, Nginx configuration, PM2 process management, CI/CD pipelines, monitoring, performance tuning, and critical production debugging.
Actively handled production debugging, performance optimization, system scalability, and critical issue resolution.

Full Stack Developer
Webkalakaar Pvt Ltd — Jaipur, India
October 2023 – July 2024

Worked on multiple client-facing and internal projects including LMS platforms, admin dashboards, and collaborative systems.
Developed responsive and scalable frontend applications using React.js, TypeScript, Ant Design, and Tailwind CSS.
Implemented real-time functionality such as chat systems and whiteboard collaboration using Socket.IO.
Integrated frontend applications with Node.js and MongoDB-based REST APIs.
Implemented authentication, authorization, and role-based access control across applications.
Optimized application performance and resolved live production issues.

PROJECTS

Solar ERP & SunCity Solar Platform
Developed a business ERP platform for solar operations including dashboards, automation workflows, reporting systems, and user management with WhatsApp-based notifications.

AI Caller System (Enterprise Project)
Built an AI-powered calling system using ElevenLabs APIs for voice cloning and text-to-speech with real-time calling workflows and automation triggers.

AI Chatbot Platforms
Designed and developed AI chatbots for company services and customer support using API-based integrations and workflow automation.

WhatsApp Automation Workflows
Implemented WhatsApp auto-messaging, template-based notifications, lead follow-ups, and webhook-driven workflows using Meta APIs and n8n.

LMS Platforms
Created learning management systems supporting live classes, admin dashboards, user management, reporting modules, and responsive UI.

CCL Admin Panel & Website
Developed role-based admin dashboards and management systems along with business websites for internal operations.

AI Cart Platform
Built admin panels, backend APIs, and automation features for cart-based workflows and analytics.

Virtual Station
Developed a real-time collaborative workspace with multi-user interaction and live updates.

Business & Corporate Websites
Designed, developed, and deployed multiple business and service-based websites.
